

Development Resources | **Circle Keyboard Configurator: Enhancing Versatility and Customization for the CIR615A Contactless Smart Card Reader**

AB Circle has launched the **Circle Keyboard Configurator**, a powerful tool designed to enhance the **CIR615A Contactless Reader**. This software enables seamless HID function activation, transforming the device into a versatile keyboard wedge. To support global deployments, it features localized layouts including **QWERTY**, **QWERTZ**, and **AZERTY**.

Users can now customize data output with adjustable delays, byte reversal, and custom prefixes. Furthermore, the tool allows for advanced data extraction from specific sectors of **MIFARE®** and **NTAG®** cards. This release reinforces AB Circle's commitment to providing flexible, user-friendly, and secure identification solutions for enterprises worldwide.

Exhibitions | **Future-Proof Your Security: Discover Our "My Number" Card Solutions at Tokyo Big Sight**

AB Circle is excited to showcase its latest security solutions at **Japan IT Week Spring 2026**, held from April 8–10 at Tokyo Big Sight. We will feature officially certified "My Number" card readers, including the **CIR415A** and **CIR315A**, and the innovative **Circle One-Touch** biometric FIDO2 security card. Visitors can also see our face-to-face identity verification solution using the **CIR715A**. We will conduct a live demonstration of this high-security authentication tool customized for the Japanese market, so please be sure to stop by our booth at East E2-26.
