

#### Products | **AB Circle unveils the CIR515A: A Bluetooth® Contact Smart Card Reader**

AB Circle has launched the **CIR515A Bluetooth® Contact Smart Card Reader**, featuring Bluetooth® wireless connectivity and USB operation through a detachable hybrid cable supporting both USB Type-A and USB Type-C connectors. The Bluetooth® feature provides greater mobility and deployment flexibility in customer-facing environments where cables may be cumbersome, while the detachable hybrid cable ensures compatibility across a wide range of deployment scenarios. With the introduction of the CIR515A and the existing **CIR415A Bluetooth® Contactless Smart Card Reader**, AB Circle now offers Bluetooth® Smart Card Readers for both contact and contactless applications, giving customers greater flexibility in selecting a solution that best fits their needs.

#### Development Resources | **AB Circle's USB reader are now compatible with the Windows 11 on ARM**

With the growing adoption of Windows on ARM devices, AB Circle has updated its entire range of USB smart card readers, including contact, contactless and dual-interface models, to provide full support for Windows 11 on ARM devices while maintaining compatibility with Windows 7, 8.1, 10 and 11 on x86-based platforms, including Intel and AMD processors. By extending support to Windows 11 on ARM, AB Circle continues its commitment to enhance its products to support the latest operating system, ensuring seamless compatibility for users across a wide range of applications. Users can download the latest v2.4.0.0 driver from the [download](#) page for their respective device.
